- All students are required to register for **GÇD200 – Gönüllülük Çalışmaları**.
- All students are required to register for the following courses:
 - **MED201**
 - **MED202**
 - **MED203**
 - **MED204**
 - **MED205**
 - **MED206**
- All students are required to select **two (2) elective courses** from the elective courses listed below.

Presentation Techniques Skills
Experimental Research Techniques
MED209 Medicine and Art
MED216 Histological Staining Techniques
MED217 Introduction to Cancer Bioinformatics
MED218 Environmental Health and Water Safety

- Students repeating an academic year are not required to retake Clinical Skills Training, GÇD200 (Gönüllülük Çalışmaları), or elective courses that they have previously passed.
- Course registration must be completed for the 2026–2027 Fall Semester. Please note that no additional course selection will be conducted for the Spring Semester. Students are solely responsible for completing their course registration accurately and within the designated registration period. Students who fail to complete the course selection process will be removed from the relevant course lists.
- After completing your course selections, please ensure that you save your selections and complete the finalization process. Failure to finalize your course registration may result in your selections not being officially recorded or processed.
